BAKER & SCRIVNER  
ATTORNEYS-AT-LAW

July 23, 1979

Clayton Chemical Company  
Sauget, Illinois 62206

Attn: Mr. Haney

Dear Sirs:

I am the Village Attorney for the Village of Sauget.

Within the last two(2) weeks, the Village has learned that, without its permission or consent, your have:

A. dug a drainage ditch to drain the property you leased from the Railroad onto Village lands lying to the south; and

B. used Village lands even further south to dump chemicals and other wastes.

In addition, your have requested Keeley Brothers Contracting Company to spread the chemical and other wastes over other lands owned by the Village.

We are willing to discuss the drainage problem with you. However, unless and until a mutually agreeable solution is effected, you shall cease draining your property onto Village land. (In fact, we have directed our contractor to erect a dam at the Village's north property line to stop such drainage.)

Also, your shall immediately cease dumping of any waste upon Village lands and you shall also commence removing what is already there, continuing such removal diligently to its completion.

It is not our present intention to charge you any rent or damages if your comply with these demands, but our final decision in such respect will not be made until all wastes have been removed and we can determine what permanent damage, if any, has been caused by you.

You must realize that you are in violation of Illinois EPA regulations.

Very truly yours,

HAROLD G. BAKER, JR.
